- Nature Imprisoned at the Zoo
- Why, What, Who Barbarian
- Poetry Page
- Absolute Divergence
- Fuck Governments

### ***Barbarian & Fifth Estate***

This issue of the *Daily Barbarian* is not only being distributed throughout the Detroit area for free, but thanks to the members of the *Fifth Estate* collective, it is also appearing as the center four pages of their paper. This means that along with the 3,000 copies we're printing, an additional 3,000 will be sent all over the U.S. and different parts of the world through the subscription and bookstore sales of the FE.

Both the *Barbarian* and the FE are anti-authoritarian publications, sharing basically the same views and ideals. In fact, some people work on both publications, but we want to point out that both publications are separate entities. The FE collective makes no editorial decisions concerning the *Barbarian*, and the same goes for us in relation to their project. You might then ask, "Why publish two separate papers?" Apart from the two publications having different functions and priorities, we believe that there should be dozens of *Barbarians* and *Fifth Estates*, not only in Detroit, but everywhere.

In the '60s, "underground" newspapers appeared and flourished because not only had the "legitimate" press lost what little credibility they had, but there was also a growing need for people to express themselves in a manner that was not allowable in the establishment newspapers. Now it's the '80s and those "legitimate" newspapers that people rebelled against are still here, with their traditional policy of lies and non-events they just put some new window-dressing on it—their traditional policy of inaccessibility and all of this with even less credibility than before. They're

## NATURE IMPRISONED AT THE ZOO

the 1990s, the number of people who have been infected with HIV has increased significantly. In 1990, there were approximately 1.5 million people living with HIV worldwide. By 2000, this number had risen to over 40 million. The increase in HIV infections is a major public health concern, as it is a leading cause of death and disability. The World Health Organization (WHO) estimates that there are currently over 40 million people living with HIV worldwide. The number of people who have died from AIDS is also increasing, with over 25 million people having died since the beginning of the epidemic. The WHO also estimates that there are over 10 million people who are at risk of becoming infected with HIV. The increase in HIV infections is a major public health concern, as it is a leading cause of death and disability. The WHO estimates that there are currently over 40 million people living with HIV worldwide. The number of people who have died from AIDS is also increasing, with over 25 million people having died since the beginning of the epidemic. The WHO also estimates that there are over 10 million people who are at risk of becoming infected with HIV.

the 1980s, the U.S. economy was in a state of stagflation, with high unemployment and inflation. The Reagan administration implemented a series of policies aimed at reducing government spending and increasing private sector growth. These policies, known as Reaganomics, led to a period of economic growth in the 1980s, but also contributed to the rise of the New Right movement. The New Right was a conservative political movement that emerged in the 1970s and 1980s, advocating for free-market capitalism, limited government, and traditional social values. The movement was led by figures such as Ronald Reagan, who was elected President in 1980. Reagan's policies and the New Right movement played a significant role in shaping the political and economic landscape of the United States in the 1980s and 1990s.

## inside:

still here, but the “alternative” press—we don’t mean those slick advertising circulars like the *Detroit Metro Times*—has almost disappeared. We believe the need is still there for the FEs and *Barbarians* of the world.
